

OUR WORLD IS CHANGING QUICKLY, SO...

What do YOU choose for YOUR future?

Fresh air and clean water, and many beautiful safe places to explore and play

Healthy non-chemical food

Sustainable industries that use renewable resources and don't pollute our world

or

Polluted air, chemical filled water, dan garbage everywhere

Food grown with chemicals that damage the environment and are not safe for us to eat

Industries that use up all our natural resources and pollute the environment

The future is up to all of us. Everyone needs to make a choice to help keep our world clean and safe. We need to take action now! What do you think the world will look like in the next few years if we don't start caring today?

DISPOSE OF YOUR GARBAGE WELL

Don't just throw garbage anywhere, because the garbage will pollute the air and soil.

Don't burn garbage, because the chemicals in some garbage will release into the atmosphere, polluting the air we breath.

Tell your friends and family about the dangers of plastic garbage and encourage them to use cloth bags for shopping, instead of plastic.

Organize clean up activities in your school and village.

BE AWARE, TAKE CARE OF WATER

Water is the source of life, so keep water clean.

Organize clean up events at rivers and beaches where you live.

Fix any leaky water taps at your house or at school.

Don't leave the water tap running if you are not using it.

SUPPORT SUSTAINABLE INDUSTRIES

Buy organic foods to support organic farmers.

Use natural products which are not harmful to the environment.

Don't buy old growth hard woods, or any products from endangered plants or animal species.

What can
YOU do
about it?
